Ayush
Full-Stack Developer

I am a full-stack web developer with a passion for creating dynamic and user-friendly websites and applications. I have experience in working with various technologies and frameworks, such as HTML, CSS, JavaScript, React, Node.js, MongoDB, etc. I enjoy learning new skills and exploring new challenges in the web development field.

Projects

Secrets
https://secrets-ayush.onrender.com
Used: **Node.js, Express.js, EJS, MongoDB, Mongoose, Passport.js, Google-OAuth2.0**

This web application provides a safe and anonymous platform for users to share their secrets with others. Users need to register with a valid email and password, which will be encrypted and protected using hashing and salting techniques. Alternatively, users can also authenticate themselves using their Google account. All the secrets are stored and accessed in MongoDB Atlas, a cloud-based database service.

Daily Journal
https://daily-journal-ayush.onrender.com
Used: **Node.js, Express.js, EJS, MongoDB, Mongoose, Bootstrap**

This application is a versatile blogging platform that allows users to create, read and edit various blogs on diverse topics. All the blog data is securely stored and managed in MongoDB Atlas, a cloud-based database service.

Newsletter
https://newsletter-ayush.onrender.com
Used: **Node.js, Express.js, MongoDB, Mongoose, Bootstrap**

This application offers a convenient way for anyone to subscribe to our monthly newsletter and stay updated with our latest news and offers. There are two modes: light and dark.

To Do List
https://todolist-ayush.onrender.com
Used: **Node.js, Express.js, EJS, MongoDB, Mongoose, Bootstrap**

This application is a handy tool for managing your tasks and projects. You can easily add and delete items, as well as create multiple to-do lists for different purposes.
